extraordinary

Personality matures with space

Health, safety and creativity are key factors in children's personality development. We take this to heart with every moll product, whether an innovative design or an add-on part.

Our system's modularity lets children and teens easily customize their desks to their own way of learning and their current taste. Our unique desk systems have height and tilt adjustment, interchangeable color and storage elements and add-on parts to offer optimal freedom for creativity, healthy learning and discovering one's own way of working.

Safety, ergonomics and quality are in every detail. moll products are made in Germany for long life and sustainability. We lead the way in developing height-adjustable, ergonomic desks. Innovative design and sophisticated function keep our products on the cutting edge of research and technology.

As the world's first developer of functional furniture that grows with children, our children's and teens' furniture aims for outstanding ergonomics and function. This has characterized the moll brand for more than 90 years — children grow, and we grow with them.

As the inventor of desks that grow with children and teens, for more than 90 years we have provided the best conditions for children to develop healthily and successfully. Sustainable quality, function and design are the focus of our business, whether in a beginner model or the premium range.

Martin Moll, CEO

easy

Joker makes learning easier

Clear, reduced and functional — our Joker base model is inspiring for its deliberate minimalism and clear design options that skip on nothing: The height adjustment, tilt-adjustable work surface and choice of decor and color application create comfort, ergonomics and pleasure at work.

clear

Joker — the easy starter model

The Joker desk system is our trump card. It is captivating for its reduction to classic moll details but does not compromise in design, quality and function. The love of detail, of the product and the workmanship can be seen at first sight.

adjustable

Ergonomic Sitting 101

Ergonomic sitting at a desk means relieving the body as well as possible, and no forced positioning. This is the only way to achieve relaxed seating that promotes concentration. It combats defective posture, backaches and headaches. For this to succeed, the desktop's tilt adjustment must be right for the given activity.

Recommended angles for best posture:

0 – 5° for drawing and similar activities

8 – 12° for writing tasks

15 – 20° for reading

- 1 There is really no “right” or “wrong” sitting. For healthy sitting posture, the workplace must be adapted to the child's body proportions at every age. Adjusting the writing furniture begins with the stool. The second step is to adjust the desk height.
- 2 The chair height is chosen so that the front edge of the seat more or less corresponds to the height of the kneecap. The seating height is correct when the angle between the thigh and the torso is slightly open (larger than 90°) and the feet are in full contact with the floor. A forward incline of the seating surface supports upright, concentrated work at the desk. The pelvis is tilted slightly forward and the back is erect. A flexible seating surface also allows dynamic sitting.
- 3 The seating depth is adjusted so that the thighs lie across a broad surface with no pressure from the front edge of the seat. The space between the chair's front edge and the lower leg should be about the width of four fingers. This keeps the legs well supplied with blood. The backrest height is chosen so that the backrest supports the torso up to right below the shoulder blades. This takes stress off the back when reposing.
- 4 To determine the right desk height setting, check how the arms lie on the desk. It is correct when the arms are at an angle a little more than 90°. This relieves the body, and the neck muscles remain loose.

catchy

Joker likes it fresh

Joker desktop adjusts with a basic spring supported tilting mechanism and can be completed with the Side Top addition to meet growing needs of space. Every desk comes with six accent colors, a child's play to change them. With classic decors in white, maple and oak Joker becomes the all-purpose all-rounder with classic decors in white, maple and oak.

Classic height adjustment: Manual height adjustment with proven hook fitting, 10-step adjustment.

Container Pro: Container with two self-closing drawers and cross-dividers for formats up to DIN A3, lockable utensil compartment, practical partitions, two lockable castors, six interchangeable color applications. With a Pad 15, the Container Pro becomes a stool.

Container Profi: Practical shelf attachment for files and books, adjustable shelf bases, drawer elements and technical details identical to Container Pro.

Surfaces: Choice of three colors: White, Maple and Oak.
